PROJECTS

Digital Assistant for legal awareness | *Node.js, Express.js, MongoDB, OpenAI*   Feb 2023 - May 2023

- AI Integration: The project utilizes the OpenAI API, indicating that it incorporates some form of AI-based assistance or functionality.
- Backend Structure: Built with Node.js and Express.js, providing a scalable and efficient backend.
- Database Management: MongoDB is used to handle data storage, managed through Mongoose, an object data modeling (ODM) library.
- Authentication:. JWT is implemented for user authentication, ensuring secure access to the system.
- View Rendering: EJS is used to render dynamic views on the frontend, allowing for a smoother user experience with HTML templating.
- Development Tooling: Nodemon helps during the development phase by automatically restarting the server whenever code changes are made, streamlining the workflow.

Online Shopping Platform | *HTML, CSS, JavaScript, Node.js, MongoDB*   Nov 2024

- Developed a secure and responsive online shopping platform.
- Improved website performance for a smoother user experience.
- Elevated user satisfaction with an intuitive UI.
- Enhanced accessibility by making the platform compatible across devices.
